

IN THE CLAIMS:

1. (Currently Amended) A collapsible structure, comprising:

a single first base panel having a foldable frame member that has a folded and an unfolded orientation, and a material covering [[portions of]] the frame member when the frame member is in the unfolded orientation, with the material assuming the unfolded orientation of its associated frame member, the first panel having an outer periphery;

a single second upper panel defined by a single foldable frame member that has a folded and an unfolded orientation, and a material covering [[portions of]] the frame member of the upper panel when the frame member of the upper panel is in the unfolded orientation, with the material of the upper panel assuming the unfolded orientation of its associated frame member, the second panel having opposing first and second end edges;

a first interconnecting piece that couples the first end edge of the second panel to the outer periphery of the first panel; and

a second interconnecting piece that couples the second end edge of the second panel to the outer periphery of the first panel;

wherein the first and second end edges extend [[beyond]] outside the outer periphery of the first panel.

2. (Original) The structure of claim 1, wherein the second panel is flexed so that the first and second panels define an interior space, and with the opposing first and second end edges of the second panel coupled via the first and second interconnecting pieces to opposing locations of the first panel.

3. (Original) The structure of claim 2, wherein the second panel has a front edge that defines an opening for ingress and egress to the interior space.

4. (Original) The structure of claim 1, wherein the second panel has an outer periphery, and wherein the first and second panels each has a sleeve extending along the outer peripheries thereof for retaining the respective frame member.

5-70. (Canceled).

71. (Original) The structure of claim 1, wherein the connections of the first and second interconnecting pieces to the end edges of the second panel and the outer periphery of the first panel are not detachable.

72. (Original) The structure of claim 1, wherein the first and second interconnecting pieces are fabric pieces.
